Professional Summary

Senior Salesforce Developer / Technical Lead with 9+ years of hands-on experience delivering scalable, enterprise-grade solutions across Salesforce Classic and Lightning. Proven senior technical authority with a strong track record in reducing technical debt, defining development standards, and designing multi-cloud Salesforce architectures. Expert in Apex, Visualforce, Lightning Web Components, and Salesforce APIs, with extensive experience leading integrations with external platforms. Experienced in contract-based, remote delivery, driving immediate impact while ensuring long-term platform health.

Experience

Global SaaS Platform, Salesforce Technical Lead EU Remote
2025 - 2026

- Designed, implemented, and maintained automated release and package deployment (1GP, 2GP) processes to support Salesforce push upgrades
- Contributed to the adoption of GitHub Actions by building and maintaining CI/CD workflows for build, test, and deployment automation. Develop automation scripts in bash, node and python
- Designed integration patterns using Named Credentials, Platform Events, and external APIs

Ebury, Senior Salesforce Developer UK remote
2022 - 2025

- Re-architected Salesforce API layer to support scalable, secure connections with banking systems
- Refactored Apex services and custom objects to reduce org complexity, improve test coverage, and performance
- Implemented robust release governance for high-compliance deployment cycles

Deloitte (Consulting), Senior Salesforce Consultant EU / UK
2019 - 2022

- Delivered technical solutions across multiple Salesforce clouds including Sales, Service and Experience Cloud
- Designed and implemented Lightning UI components for responsive internal and client-facing portals
- Led remediation of legacy Visualforce and Apex into modular LWC-based architecture
- Supported API-first integrations with cloud-native middleware and external services

Attention Crm Consulting Kft, Salesforce Developer Budapest
2017 - 2019

- Developed custom Apex logic and user interfaces in visualforce pages and aura
- Owned legacy code cleanup initiative and migration path to Lightning
- Built test automation and sandbox management scripts integrated into CI pipeline
